#	Experiment	Configuration
1	Target Latency: 10 Seconds	Executor Granularity: 1 Executor Strategy: Queue Aware Table Initializer: Optimized
2	Target Latency: 20 Seconds	Decision Interval: 1 Minute History Window: 3 Minutes for Workload 1 History Window: 2 Minutes for Workload 2 Learning Factor = 0.7
3	Target Latency: 30 Seconds	Discount Factor: 0.9 Policy: Greedy Reward: Prefer Scale-In When Load Is Decreasing
